The First Term English Test

Modern lifestyles are completely different from the way people lived in the past. Some people think the changes have been very positive, while others believe **they** have been negative.

First, modern world makes life faster and convenient. The growth of new technologies, the cover of the mobile phones and the internet helps us solve many problems **which** were extremely difficult in the past.

Secondly, human's lifestyle, including the way we live and act, have changed as well. People work and walk faster and more efficiently; "hurry up" seems to be present life slogan. Even though **it** makes us tired but it's still positive for society's development. In short, being hurry make people more active and more useful.

Finally, human attitudes have also changed vastly. An open mindedness replaces old fashion thinking. We now have a new way of looking at relationship between men and women of family members.

In brief, modern lifestyle is different from the old on all the sides: attitudes, life rhythm and physical conditions. There is no doubt that we have to lose something even many things. However, what we get in life is noticeable.

(Adapted from the internet)
